

# **IT Certified Technician**

## **Job Description**

Under the supervision of the technology directory, the certified IT technician must have achieved a nationally recognized technology certification (e.g., A+, Network +, CCNA, ACMT, etc.) and is responsible for the maintenance, support, and implementation of district technology equipment.

### **Specific Responsibilities**

1. Install technology equipment following industry and district procedures.
2. Assist with advanced troubleshooting and maintenance of the district's technology equipment.
3. Assist with the inventory and tracking of the district's technology equipment.
4. Assist with the installation and maintenance of computer software.
5. Assist with other technical support duties as assigned.
